Professional Summary

Results-driven Full-Stack & AI/ML Engineer with 2 software engineering internships and 6+ end-to-end shipped projects spanning computer vision, NLP, and cross-platform mobile development. Proficient in React.js, Node.js, Python, FastAPI, and scikit-learn. Proven ability to architect production-grade systems — from real-time CCTV surveillance with YOLOv8 to ATS resume analyzers using TF-IDF. Graduating May 2026 (FAST-NUCES, CGPA 3.02/4.0). Seeking full-time Software Engineer, Full-Stack Developer, or AI/ML Engineer roles at international or remote-first companies.

Education

FAST National University of Computer & Emerging Sciences

Bachelor of Science in Software Engineering — CGPA: 3.02 / 4.0

Karachi, Pakistan

Aug 2022 – May 2026

Work Experience

Full-Stack Developer Intern

Jun 2025 – Aug 2025

Scalech Pvt. Ltd.

Karachi, Pakistan

- Architected and deployed production-grade web applications using **React.js** and **Node.js**, integrating third-party APIs and payment gateways that reduced manual workflow steps by **~30%**.
- Optimized frontend performance via lazy-loading, query refactoring, and response caching, improving Lighthouse performance scores and cutting average API response times by **20%+**.
- Collaborated within **Agile/Scrum** sprints — sprint planning, daily stand-ups, code reviews — consistently delivering features on schedule across a multi-developer codebase.

Mobile App Developer Intern

Jun 2024 – Aug 2024

Scalech Pvt. Ltd.

Karachi, Pakistan

- Delivered **2 production-ready cross-platform mobile modules** in **React Native / Expo** (iOS & Android) within an 8-week sprint; commended by the engineering lead for code quality and delivery speed.
- Implemented **JWT authentication flows**, real-time data synchronization, and offline-first persistence using **AsyncStorage**, ensuring zero data loss on device restart.

Projects

Helpix | *AI Vehicle Re-Identification & Surveillance System* | Python, YOLOv8, OSNet, FastAPI, React.js, MongoDB **Final Year Project**

- Engineered a real-time multi-camera CCTV surveillance system performing **accident detection** and **cross-camera vehicle re-identification** using **YOLOv8** and **OSNet/TransReID**.
- Built a **FastAPI + WebSocket** backend delivering sub-second live alerts and a **React-Leaflet** map dashboard with timestamped route logs and **MongoDB** audit trail for law enforcement use.

FaceNet-MLP | *Celebrity Face Recognition System* | Python, NumPy, PCA, Flask

- Built a **from-scratch MLP neural network** in pure NumPy (zero ML frameworks) achieving **88–95% test accuracy** across 31 celebrity classes from 3,750+ images.
- Applied **PCA (Eigenfaces)** for dimensionality reduction (4096 → 200 features, 95.2% variance retained) and **data augmentation** (3× dataset) to improve generalization; deployed as a Flask web app with <100ms inference.

ResumeIQ | *Smart ATS Resume Analyser* | Python, Flask, scikit-learn, TF-IDF, NLP, JavaScript

- Engineered a resume-to-JD match scorer using **TF-IDF + cosine similarity**, evaluating 4 ATS dimensions and producing an actionable score out of 100 with keyword gap analysis.
- Auto-classifies resumes across **8 job categories**; implemented client-side PDF export via **jsPDF** — eliminating backend round-trips and reducing server load.

DiabetesIQ | *ML-Powered Diabetes Risk Predictor* | Python, Flask, scikit-learn, Logistic Regression

- Trained a **Logistic Regression** classifier on 768 patient records (Pima Indians UCI dataset) achieving **~79% accuracy**; deployed via Flask REST API with confidence scoring and probability breakdown.
- Implemented smart data cleaning (zero-value imputation with column means) and **StandardScaler** normalization; served real-time predictions with personalized health insights via async JavaScript frontend.

Ajmal Furniture | *Full-Stack E-Commerce Platform* | PHP, MySQL, JavaScript, HTML5/CSS3

- Delivered a full SSR e-commerce site with shopping cart, order history, and admin CRUD panel; enforced security via **session-based authentication**, input sanitization, and **role-based access control**.

Technical Skills

Languages: Python, JavaScript, TypeScript, PHP, C++, Java

Frontend & Mobile: React.js, React Native, Expo, HTML5, CSS3, REST APIs, WebSockets

Backend & APIs: Node.js, Express.js, Flask, FastAPI, JWT Authentication, RESTful API Design

AI / ML / CV: scikit-learn, YOLOv8, OSNet/TransReID, TF-IDF, Logistic Regression, PCA, NLP, Transformers (RoBERTa), OpenCV, NumPy, Backpropagation, Data Augmentation

Databases: MySQL, PostgreSQL, MongoDB, Firestore, AsyncStorage

Tools & Platforms: Git, Docker, VS Code, Android Studio, Figma, Postman, Power BI

Concepts: Agile/Scrum, OOP, Data Structures & Algorithms, Computer Vision, System Design
